PROFESSIONAL SUMMARY

Third-year BSc (Hons) Information Technology undergraduate specializing in Artificial Intelligence & Machine Learning with a GPA of 3.58/4.00. Hands-on experience developing machine learning and NLP projects, building Python-based data processing and business automation workflows, and developing full-stack applications. Seeking an internship or entry-level opportunity in AI Engineering, Machine Learning, Data Science, or Data Analytics.

TECHNICAL SKILLS

AI & Machine Learning:	Python, TensorFlow, PyTorch, Scikit-learn, Classification, Natural Language Processing (NLP), TF-IDF, Word2Vec, Feature Engineering, Data Preprocessing
Data Science & Analytics:	Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Business Data Automation
Programming Languages:	Python, Java, JavaScript, C++, C
Web & Backend:	React.js, React Native, Node.js, Express.js, REST APIs, HTML5, CSS3
Databases & Tools:	MongoDB Atlas, PostgreSQL, Supabase, MySQL, Git, GitHub, VS Code, Google Colab, Expo, Arduino

EDUCATION

BSc (Hons) in Information Technology — Specialization in AI & Machine Learning	2024–2028 Expected
Sri Lanka Institute of Information Technology (SLIIT)	GPA: 3.58/4.00

SELECTED TECHNICAL PROJECTS

AI-Based Network Anomaly & Fault-Risk Detection — In Progress	Python, Pandas, NumPy, Scikit-learn, Google Colab
- Developing a machine learning pipeline to analyze telecom network KPI data and identify abnormal network behavior and potential fault risks. - Working on data preprocessing, exploratory data analysis, feature engineering, and anomaly-detection techniques for network performance analysis. - Comparing supervised and unsupervised machine learning approaches for identifying abnormal network conditions.	
Fake News Detector — Machine Learning & NLP	Python, TensorFlow, PyTorch, TF-IDF, Word2Vec
- Developed an NLP text classification pipeline to detect misinformation using the 72K+ article WELFake dataset. - Implemented text preprocessing, TF-IDF vectorization, and Word2Vec feature extraction for textual representation. - Trained and evaluated machine learning models for automated classification of news articles.	
Sharentals — Business Data Automation & Analytics	Python, Pandas, Data Cleaning
- Automated Linkt toll transaction and 365/iStarr booking-data processing using Python and Pandas, including data cleaning, matching, duplicate detection, and structured master-data generation. - Implemented vehicle-registration normalization and transaction-matching workflows for processing operational data. - Analyzed fleet data to generate vehicle availability statistics and idle-vehicle breakdown reports.	
FixNow — Full-Stack Maintenance Platform	React Native, Expo, Node.js, Express.js, MongoDB Atlas
- Developed a mobile maintenance reporting and issue-tracking platform for managing facility maintenance workflows. - Implemented REST APIs, MongoDB data structures, user roles, and application functionality. - Used Git for version control within an Agile development workflow.	

PROFESSIONAL EXPERIENCE

Visiting Lecturer / ICDL Instructor — McLarens Maritime Academy	2026
- Instructed 50+ students in practical computer literacy, Microsoft Office applications, and ICDL-related modules. - Conducted laboratory evaluations and technical assessments.	
Marketing Manager — Apple Tree Tots	2025–2026
Managed digital marketing activities and analyzed campaign performance to support audience engagement.	

CERTIFICATIONS

- AI for Social Impact — Asian Development Bank Institute
- Front-End Web Development — University of Moratuwa (CODL)

LEADERSHIP & ACTIVITIES

- Co-Chairperson**, IoT Club — SLIIT
- President**, Robotics Club — ICBT City Campus
